

ACCESS CONTROL COMPOSITE CABLES

More Protection, Smoother Pulls

Eliminate undue frustration and excess labor costs with smooth pulls and quick installations, run after run. Honeywell Genesis® Access Control Composite Cable joins individual lock power, door contact, card reader and request-to-exit cables into a convenient, jacketed bundle.

- **Snag resistant, pull after pull** – A protective overall jacket allows cables to bend freely around corners and obstructions—without getting hung up on nails or other protrusions.
- **Easy to strip overall jacket** – The thin jacket prevents damage to internal cable while stripping quickly and easily at the point of termination.
