

# STEADFAST SOLUTIONS

From a Name You Can Trust

**When it comes to high-performance, low-voltage cable for any application, Honeywell Cable works with you to consistently deliver results you can count on.**

Primarily produced with state-of-the-art equipment, by highly-trained technicians, in our world-class facility in Pleasant Prairie, Wisconsin, we manufacture superior quality, low-voltage power and data cable for the Americas.

At Honeywell Cable, innovation starts with the customer experience. By listening to our customers' challenges and installation frustrations, we have developed a comprehensive cable portfolio designed to deliver the best user experience.

## **Industry-Leading Products, Supported by Service That's Second to None**

Our proven track record and highly engineered solutions support our vision to be the most trusted, go-to brand in our targeted markets.

### **Proven track record**

Honeywell Cable provides the ideal connection for the following applications, complementing the electronic systems where Honeywell has been a global leader for decades:

Fire

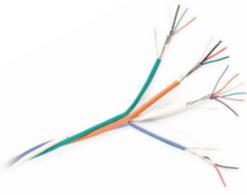

Security & Control

HVAC/Thermostat

## Highly engineered solutions for incomparable performance

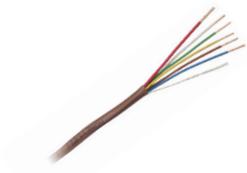

It's not enough for us to offer high-quality, compliant cable. Our goal is to also deliver customers and installers an optimal user experience with our innovative Honeywell Genesis® Series Cable product line, including:

**PROFUSION®** – Revolutionary twisting scheme holds pairs together without binding and makes for easier installation – just tape the end and pull. The most cost-effective solution for residential structured cable applications.

**WAVEFLEX®** – Flexible jacketing technology for faster terminations and easier installations. Its ribbed interior prevents damage to braids, shielding or conductors. Jacketing technology allows the outer jacket to strip more efficiently.

**Hybrid Thermostat** – First cable designed specifically for the power requirements of the circuit, and ideal for both new (energy-efficient) and existing HVAC equipment.

**REACT™ Packaging** – Improved hassle-free cable dispensing that uses a patent-pending reactive brake system to eliminate tangles. Comes in a reinforced, durable, stackable and recyclable box.

**Cable for That! App** – A downloadable app with information about which cable is right for which application. Customers have access to what they need to know, when they need it.

**Insist on quality and reliability you can trust. Insist on Honeywell Cable.**

## Hassle-free experience enabling our customers' success every day

This is at the heart of everything we do at Honeywell Cable – giving our customers the experience they deserve with:

- 1 Superior service and support.**
- 2 Innovation in cable design and improved installation processes.**
- 3 Packaging and labeling that works with them, not against them.**
- 4 Quality warranties – standing behind products with the industry's only 3-for-1 Guarantee.**
- 5 A full line of cable and resources to support them.**

### Rounding out our robust line of products, we offer:

- A portfolio of high-powered, highly-secure network cables.
- Audio, video and multimedia cable for a range of applications.
