

Thermostat Wiring Addendum

For typical installations with nominal power supply voltages of 24V, Honeywell Hybrid Thermostat Cables comprised of 20 AWG conductors with 18 AWG conductors for connections to the main power supply support the connections between thermostats and HVAC system controls/relays.*

Honeywell Hybrid Thermostat Cables

Description	General Purpose CL2 Listed
5 Conductor Hybrid Thermostat Cable	6713
6 Conductor Hybrid Thermostat Cable	6714
8 Conductor Hybrid Thermostat Cable	6716
10 Conductor Hybrid Thermostat Cable	6718

All cables have been approved by Honeywell Environmental & Combustion Controls for use with Honeywell Thermostats. For more cable options, visit www.honeywellcable.com

** Thermostat installations with wiring run lengths in excess of 250 feet may require cables with lower electrical resistance to minimize voltage drop. For this reason, Honeywell limits the sale of Hybrid Thermostat Cables to 250ft. units.*
